High-quality workspace solutions

High-quality workplace solutions BakkerElkhuizen specialises in developing high-end, ergonomic hard- and software solutions that contribute to the physical and mental wellbeing of computer users. Our innovative solutions physically and mentally triggered to move more, work more efficiently, adopt proper working postures and alternate between postures.

Our hard- and software solutions are distributed via an extensive network of national and international resellers and distributors.

WORK & MOVE™ Software

Healthy and efficient working practices do not always go hand in hand. BakkerElkhuizen offers a unique proposition for this challenge, comprising an optimal mix of ergonomic hardware and smart WORK & MOVE™ software.

Because we believe passionately in combining health, comfort and performance. The WORK & MOVE software includes four tools that demonstrably and structurally improve the working comfort and efficiency of each individual knowledge worker and of the organisation as a whole.

- ① WORK & MOVE™ Software
- ② Sit-Stand Desks
- ③ Notebook Stands
- ④ Tablet holders
- ⑤ Keyboards
- ⑥ Ergonomic mice
- ⑦ Mouse Pads & Wrist Rests
- ⑧ Document Holders
- ⑨ Monitor Stands
- ⑩ Monitor Arms
- ⑪ CPU Holders
- ⑫ Footrests
- ⑬ Notebook Cases

Ergonomic mice

Unnatural postures which occur using a standard mouse increase the risk of discomfort in wrists and forearms. Ergonomic mice reduce muscle tension in comparison with standard flat mouse devices and are much more comfortable. There are many options and the most suitable depends on the type of work carried out, existing injuries and personal preference.

Evoluent4

Ergonomic: supports your hand in a fully upright neutral handshake position that eliminates forearm twisting
Precise: true optical resolution sensor moves the pointer quickly to reduce hand movements, with short habituation time
Version 4 improved shape: better thumb and finger support
Version 4 convenient adjustment: of pointer speed
Small version available: for hands less than about 7 inches or 178mm long from the tip of the middle finger to the wrist crease (BNEEVR4S)
Cable length: 215 cm

Dimensions: 86 x 106 x 81 mm (W x D x H)
 Weight: 173 gr
 Product code: BNEEVR4 (Righthanded)
 Product code: BNEEVL4 (Lefthanded)

Ergonomic Keyboards

Compact keyboards brings the mouse within comfortable reach, thereby reducing stress on the arms and shoulders. Using a compact keyboard is more comfortable than using standard keyboards (Van Lingen et al., 2003).

Around 90% of users never or rarely use the numeric part of the keyboard (Cakir, 2008) so for the most part it is not required. When the numeric pad is used it should be possible to place it for left or right handed use.

BakkerElkhuizen UltraBoard 940

- Double connectivity:** USB cable or Bluetooth.
- Multi-pairing:** Up to 5 devices.
- Keys:** Full size responsive keys with dark letters on a light background for easier viewing.
- Compatible:** Mac and Windows OS.

Laptop Stands

Notebook stands raise the screen of a laptop to a comfortable viewing height. This places much less stress on the neck enabling more comfortable work.

BakkerElkhuizen notebook stands that have an inbuilt document holder have been independently tested. Our stands increase productivity by 17%, reduce stress on the neck by 32% and result in a 21% increase in comfort (Lindblad et al., 2004).

BakkerElkhuizen UltraStand

Unique: The thinnest and lightest notebook stand ever.
Made-to-measure: Fits every type of laptop, including those with docking station ports.
Ergonomic: Laptop screen always at the correct height
Convenience: Always attached so never forgotten.
Portable: Create a mobile workstation wherever it's used

Document Holders

Document holders bring keyboard, document and screen into a straight line for comfortable working. When documents are placed to the side this causes unnecessary strain on the neck.

Using an in-line document to bring everything into a straight line shortens viewing distances, increasing productivity.

© BakkerElkhuizen

BakkerElkhuizen FlexDesk 640

Multi-functional: Refer to documents and make notes using the writing slope, which slides over the keyboard when needed.
High quality: Smooth work surface, easy gliding rails, and rigid design using thick acrylic.

Ergonomic mice | Ergonomic Keyboards | Laptop Stands | Tablet holders | Document Holders
Monitor Stands | Monitor Arms | Sit-Stand Desks | Footrests | Mouse Pads & Wrist Rests

The top of a monitor should be roughly in line with users eyes. This optimum position increases comfort and reduces the risk of injury. Productivity also goes up by 10% compared with an incorrectly positioned screen (Sommerich et al., 1998).

To reduce eye strain and ensure easy long term viewing of the screen it should be placed roughly an arms length away when a user is sat correctly.

Monitor Stands | Monitor Arms | Sit-Stand Desks | Footrests | Mouse Pads & Wrist Rests

Sit-Stand Desks

Switching between sitting and standing while working creates more variation in posture throughout the day. This reduces discomfort in the back, neck and shoulders compared with sitting at a regular desk (Choi, 2010; Rabbit et al, 2008;. Hedge and Ray, 2004; Karlqvist, 1998).

The effect of alternating between standing and sitting postures results in concentration levels remaining higher for longer (Ebara, et al., 2008). Work performance and the quality of output also improves. (Garrett et al, 2016;. Choi, 2010; Hedge and Ray, 2004).

BakkerElkhuizen Honeycomb

Multi-functional: Suitable for a variety of uses such as meetings, seminars, touchdown working, lunch or a reception.

Ergonomic mice | Ergonomic Keyboards | Laptop Stands | Tablet holders | Document Holders
Monitor Stands | Monitor Arms | Sit-Stand Desks | **Footrests** | Mouse Pads & Wrist Rests

Footrests are essential for people who can not sit with their feet flat on the floor when the rest of their workstation has been set up to support a good posture. This often happens with fixed height desks.

The adjustable range, the angle and a wear-resistant surface are important.

Mouse Pads & Wrist Rests

Wrist rests provide a guide that helps keep the arm, wrist and hands straight. This prevents over extension of the wrist which occurs when the wrist bends beyond neutral. Holding the wrist in this position for an extended period, which happens when typing and using the mouse, is a cause of discomfort and injury. Keeping the wrist off of the cold, hard desk surface also has benefit.
